Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-6, 8-12, 14-23, 25 and 26 are rejected under 35 U.S.C. 102(b) as being anticipated by Dent et al (US 6,567,475).

As shown in figures 1, 4a-5, 8-15, and 17-19, Dent teaches a method and apparatus for receiving digital data signal comprising mixer (110), amplifier (120), A/D converter (125) and processor (130) wherein the data rate, position of the signal (figures 4a, 4b, 5, 9-11, and 15) and modulation method of the received signal are determined and demodulation is performed based on the determined information. See also column 2, line 33 to column 5, line 37; column 11, line 40 to column 13, line 47; column 16, line 34 to column 31, line 35.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 7, 13, and 24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dent et al (US 6,567,475) in view of Edwards et al (US 6,947,490).

Dent et al teaches all subject matter claimed except for the using 16-QAM as a modulation method. However, 16-QAM is well known in the art of digital communications. See Edwards for different type of QAM used in communication. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the communication system of Dent et al by using the 16-QAM since it is just a matter of selecting a modulation type for communicating.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. References Koslov (5,471,508), Samuelli et al (5,754,591) and McCallister et al (6,005,897) are cited because they are pertinent to QAM communication system.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to DON N. VO whose telephone number is (571) 272-3018. The examiner can normally be reached on Mon-Fri (9:00AM - 6:00PM).
